

Rapidwerks LLC
7444 West Wilson Ave
Chicago, Illinois 60706

November 26, 2003

FOR IMMEDIATE RELEASE:

RAPIDWERKS is now ISO 7 certified class 10K Clean room facility:

Rapidwerks produces plastic molding medical products ranging in size from less than 1 Gram through 71 grams, with its ISO 7 class 10K clean room. Our class 10K clean room provides our customers injection molding and micro molding services in a clean environment ensuring continuous quality products, packaged cycle after cycle meeting our customer's stringent demands. We measured particulate and chemical contamination levels, leak checked HEPA filters, verified proper air flow, air pressure and humidity, developed personnel entry and working procedures, and provided all the logistics needed for maintaining and operating the clean room facility.

About Rapidwerks LLC: Rapidwerks serves manufacturers of medical devices and equipment, automotive equipment and accessories, mobile electronics, and telecommunications products. The company offers a variety of services that include design and engineering, rapid prototyping, precision injection molding, microinjection molding, insert molding, volume production, tool fabrication, and contract assembly. Rapidwerks also uses stereo lithography to quickly fabricate 3-D concept models.
